

Vertiqal

**Traceable, Affordable, and
Sustainable Supply Chains**

Investment Pitch Deck

www.Vertiqal.com.ng

01 | Making the World Small Again

Vertiqal connects Agri-Producers with Large buyers between Africa and the EU

Vertiqal is an **agri-procurement platform bridging Africa and the EU**, enabling seamless trade by connecting farmers, buyers, and processors. It ensures traceability, reduces costs and enhances livelihoods across the supply chain.

Globally, **Agri-food Processors experience severe shortfalls** in feedstock. **Vertiqal** finds these shortfalls and **offers to fill them quickly, affordably & sustainably**.

| The Problem

1. Fragmented Supply Chains

- Poor coordination among stakeholders leads to inefficiencies.
- Spot-market-style contracts cause glut during harvest seasons and scarcity during off-seasons, destabilizing markets.

2. Feedstock Shortfalls

- Processors lose time and money when they can not get feedstock for their plants.
- Fragmented supply chains exacerbate delays, logistical challenges, and trade uncertainty.

3. High Costs of Raw Materials

- Middlemen inflate prices, reducing profitability for buyers and affordability for end consumers.
- Scarcity further drives costs, making agrifood trade less competitive.

In 2022 The Eurozone lost €920B in due to Supply chain Disruptions – Accenture

4. Producers Suffer

- Exploitative deals deprive farmers of fair value for their produce.
- Post-harvest losses increase due to misaligned supply with demand cycles.
- Fragmented value chains and limited technology adoption restrict market access and productivity improvements.

5. Traceability Challenges

Lack of transparency in sourcing and production processes limits access to premium markets, particularly in the EU, which demands strict compliance with quality and traceability standards.

The Agri-Food Market Opportunity

The **\$8.6T global agrifood market** is evolving, and growing with **no clear Technology Supply chain Leader**. Europe is seeking reliable, cost-effective raw materials & Africa holds untapped supply potential, yet inefficiencies persist.

Vertiqal streamlines procurement, ensuring traceability, and **derisking supply chains**. With Africa's agricultural exports rising, the time to bridge this lucrative gap is now.

TAM

\$ 8.6 T

According to Alliance Global, Food Trade was at \$8.6 Trillion growing at a CAGR of 6.1%

SAM

\$ 1.6 T

Combined agrifood markets of the European Union and West Africa are estimated at around \$1.5 trillion

SOM

\$ 2.5 B

30% of Nigeria's raw material supply to food processors (approximately \$1.38 billion) and 10% of agri-based raw material imports in central Europe

Solution

Procurement Module

- Product Requests & Aggregation: Buyers post specific product needs, and AI matches them with optimal suppliers.
- Dynamic Demand-Supply Matching: Predictive analytics reduce gluts and scarcity.
- AI-Assisted Onboarding: Automated vendor verification for credibility.
- Standardized Agreements & Processing: Blockchain ensures transparent, tamper-proof contracts.

Finance Module

- Smart Contract Escrow: Secure, automated payments for risk-free transactions.
- Trade Credit & Financing: AI-backed risk assessments to provide credit solutions for suppliers.

Shipment Tracking

- End-to-End Visibility: Tamper-proof records for logistics and compliance.
- Cross-Border Technical Documentation: Automated Certificates of Origin, quality certifications, and compliance documentation.

Spot Market for Suppliers

- Live Market Listings: Suppliers showcase available stock, price, and location in real-time.
- Fair Pricing & Liquidity: AI-driven pricing insights for competitive trading.
- Market intelligence Platform that shows live commodity prices at markets we operate 24/7.

Competition

Vertical Combines Blockchain traceability & ESG compliance, Direct sourcing, AI-powered procurement & aggregation.

We take a hands-on approach seeking Demand shortfalls to fill.

OUR APPROACH IS DIFFERENT

Vertical Integration Without Capital-Intensive Farming

- AI-Powered Demand Forecasting
- Direct Farm-to-Processor Logistic
- Smart Contract Escrow Payments and Producers.
- Standardized Processing & Quality Control

Expanded Channels With Advanced Lang Ops (USSD, Social, Web, Desktop Apps)

- Multi-Language & Localized Support
- Multi-platform support
- Multi-regional support

Performance-Based Financial Incentives

- Trade and Market Analytics
- Cascading Carbon Credits & Verified Sourcing
- Automated Compliance & Certification
- Verified Supplier Ratings & Reviews
- Financing for Supply & Working Capital

Partner with International Organizations for Education & Infrastructure

- Agri-Tech Research & Training
- Logistics & Irrigation Development
- Input Supply & Subsidies

Supply Chain Traceability & ESG Compliance

- Blockchain-backed traceability ensures regulatory compliance (EU deforestation-free laws, sustainability mandates).
- Enhances transparency, reduces risk, and improves the marketability of African-sourced raw materials.

Business Model

Vertiqal drives revenue by earning commissions on procurement, and offering high-value subscriptions for scalable platforms, while profiting from carbon credit trade.

Commissions (2% – 15%)

- 10% on product marketplace sales.
- 2.5% on procurement platform sales.

Subscription - €2 - €500/month

- Tiered pricing for Agro-Intel platform, Supply Chain ERP, and logistics solutions.
- Scalable plans for NanoSMEs to multinational operators.

Carbon Offsetting Programs

- Monetizing sustainable farming through carbon credit aggregation.
- Verified producers earn and trade carbon credits with global buyers.

Certification and Audits

Partner with Certifications Organizations to Audit and certify Producers for Traceability and Carbon credits

MARTKETING PLAN

1.

Direct Enterprise Sales

Target large buyers with raw material shortfalls using competitor data insights and direct outreach and promise to fill these shortfalls within a year.

2.

SLAs & Microcredit for Producers

Provide free market intelligence to attract large buyers through organic search.

3.

SEO & Agro-Intel Traffic

Provide free market intelligence to attract large buyers through organic search.

4.

CSR-Driven Sales

Partner with NGOs, governments, and international organizations to fund mass subscriptions post-proof of concept.

5.

CSR & Institutional Partnerships

Leverage global development initiatives in infrastructure, education, and digital transformation to onboard producers

5.

Agro-Data Social Video Niche

Create engaging, data-driven short videos for social media, positioning Vertiqal as an authority in global agri-trade insights.

Traction

09 | Vertical

Q4 - 2024

€7k Pre-Seed Grant Funding Secured

- Secured **€7,000** funding agreement with GIZ and the EU to develop and launch the Vertical MVP.
- Launched Feb 2025

Q4 -2025

627 Customer Market Validation

- Completed a **survey with 500 producers and suppliers.**
- **Onboarded 610 suppliers**
- **17 Processors**

Q2- 2026

\$2m Strategic Supply Agreements. \$375k supplied.

- Signed two SLAs in Nigeria, securing **€2M/year in supply contracts with Rivers Cassava**
- Supplied **\$375k in cassava.**

ROADMAP

Q1 2025 – Platform Launch

- **Beta launch** - procurement, supplier management, and blockchain tracking.
- Secure 5 enterprise clients, onboard **200 suppliers**.
- **200 MAUs, \$50k in Transactions.**

Q1 2026 – EU Entry

- **AI-driven price forecasting and supplier risk assessment.**
- **\$25M in EU pre-arranged supply deals.**
- **50,000 MAUs, \$25M in transactions.**

Q3 2025 – Market Expansion

- **multilingual support and USSD accessibility.**
- **\$8M+ in contracts** across Nigeria, Ghana, and Côte d'Ivoire.
- **2000 MAUs, \$5M in transactions**

Q3 2026 – Supply Chain Integration

- Launch **supplier financing and carbon credit incentives.**
- Expand into three African markets, partner with MDAs and multinationals.
- **100,000 MAUs, \$50M in transactions.**

Q4 2026 – Scale

- Automate **compliance and smart contract execution.**
- Capture 5% of EU's African agri-raw imports, securing **\$150M in transactions.**
- **250,000 MAUs, \$1800M+ in yearly trade.**

Financial Projections

Financial projections show initial losses with rising costs—from €97k in Q1 to €387k in Q4—with revenues starting at approximately €84k, then turning profitable in Q5. By Q8, revenues reach about €1.56M, with costs of €523k and profits of €1.03M, reflecting robust growth and scalability.

We are poised to take over the Agro- Supply Chain Space.

Our Team

Aquila Kalagbor
Founder

8 years experience as a Technical PM.
5 years Experience in Agri Supply-chain
management
2yrs in Finance
2nd Time Founder.
Bsc. Finance,
Ex Sterling Bank, Ex Viisaus

Funders

14 | Vertiqal

Innocent Destiny
CTO

8 yrs Full Stack Engineer
BSc. Computer Science
Ex. BingPay

Dr. Adeshina Edmonson
Product Designer

4 yrs UI/UX and Brand Designer
MD Medicine and Surgery
Ex. Sigma Finance

Betule Asimu
Marketing Lead

8 yrs Sales Manager
HND Statistics
Ex. Alliance, Ex. Ensure Insurance

Joy Ugoyah
Data Lead

5yrs Full Stack Data Engineer
BSc. Petroleum Engineering
M.Sc. Project Engineering
Ex. Querifyer, Ex. Qinsight

Dr. Precious Itolima
Supply Chain Lead

14+ yrs Agricultural Supply Chain & Monitoring
and Evaluation
PhD (In View), Marine Biology and Pollution
Ex. Project Manager, Farmsby Limited,
Research Technologist, Rivers State University
